

Total Care Plus

Formulary List

The following is an abridged version of the drug list (formulary) that is at the core of your prescription-drug benefit plan. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate. THIS LIST IS SUBJECT TO CHANGE.

PLEASE NOTE: Brand-name drugs may move to **non-preferred** status if a generic version becomes available during the year. Not all the drugs listed are covered by all prescription drug benefit programs; check your benefit materials for the specific drugs covered and the copayments for your prescription drug benefit program. For specific questions about your coverage, please call the phone number printed on your member ID card.

KEY

- Tier 1: Generic Medication
- Tier 2: Preferred Brand Medication
- Tier 3: Non-Preferred Brand Medication
- Tier 4: Specialty Medication

For the member: Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate.
